SUMMARY

I Am Helping Startup Founders And Small to Mid-Sized North American Companies In How To Leverage Blockchain And Other Emerging Technologies To Upgrade Their Business Processes.

- **3.5+ years** of software development experience in building Blockchain-Powered Applications, Networks, Smart Contracts, and Distributed Applications on **Public, Private & Hybrid Blockchain Networks**.
- I Work As Blockchain Team Lead Here And Help Clients With **Custom Blockchain Solution Development**, I Work As **CTO Or Solution Architect For Non-Technical Startup Founders** And Advice Them On Building **Scalable And Secure System Architecture**.
- Other than development, I **Mentor Juniors And Train Them With Various Blockchains and Frameworks**.
- Hands-on experience writing Smart Contracts using **Solidity** (EVM Compatible Chains), **GoLang** (Hyperledger Fabric) & **RUST** (Solana, NEAR Protocol- Beginner) and Creating **Backend/API in Node.js** for the same.
- Extensive experience creating and deploying Smart Contract on the **L1 & L2 Blockchain networks**.
- Extensive experience working with **Cloud Technologies** like AWS, Azure, Digital Ocean, GCP, etc.
- Solid knowledge of algorithms, data structures, cryptography, and data security.
- Handled **Tech/Non-tech Operations as Team Lead**, i.e Recruitment for **Blockchain & DevOps Team**s, Defining **KPIs**, Performance Measuring for Internal Evaluations

TECHNICAL SKILLS

- **Blockchain Technologies:** Ethereum, Polygon, (Other EVM Compatible Chains including L1 & L2), EOS, Hyperledger Fabric, Solana, NEAR Protocol
- **Programming languages:** Solidity, Golang, C++, Node.JS, JavaScript, React.JS (Web3.js)
- **Databases**: MySQL, MongoDB, CouchDB, etc.
- **Tools**: Hardhat, Truffle, Geth, etc.
- **Cloud & DevOps**: AWS, A2URE, Digital Ocean, Linode, Docker, Kubernetes, etc.
- **Others**: Git, GitHub/BitBucket, JIRA/ASANA, Basecamp, etc.

TOP PROJECTS WORKED ON	SOLULAB	JULY 2019 TO PRESENT

Lox Network: *Hybrid Blockchain for DApps, Lost and Stolen Devices, NFTs, Marketplace, and MetaVerse*

Highlights: Twitter Announcements

Brief: *LOX Network is a Hybrid blockchain network that provides a platform and framework to build decentralized applications.*

Technologies: *Golang, RUST, Solidity, Node.js, React.js, AWS Cloud*

Funganomics: *Pre-Sale Staking and Vesting Platform*

Brief: *Funganomics® is a company comprised of talented and passionate blockchain, software, and gaming developers who are collectively building a premier NFT ecosystem, the future of NFTs, NFT Gaming and the Metaverse.*

AnRKey X (Defi, Gaming, and NFTs)

Highlights: AnRKey X™ Raises $1.2 Million to Introduce m$ports to Crypto and Kick-Off Public Sale for Native Arcade Coin $ANRX

Brief: *AnRKey X's token, $ANRX, works like an arcade coin; the more you purchase, play, stake, sell and compete, the more $ANRX (token rewards) you earn within the gaming system.*

Technologies: *Ethereum, Matic (Polygon), Solidity, Smart Contracts (ERC20), NFT (ERC721, ERC1155), ChainLink VRF, Node JS, React JS, MongoDB, AWS Cloud*

Aladin / Alacrity (Now) - *Blockchain Network with DApps Ecosystem*

Brief: *Aladdin is a complete network with a blockchain ecosystem. Aladdin provides an ecosystem for third-party developers to establish their DApps from scratch.*

Technologies: *EOS, Blockstack, Node JS, React JS, Python, C++, Shell Scripting, AWS Cloud*

Other Projects Details: *On LinkedIn*

EDUCATION

M.Tech, *Information Technology, Rai University, 3.5+ CGPA (out of 4), Pursuing (2021- 2023)*

B.Tech, *Information Technology, L J Institute of Engineering, 8.01 CGPA (2016 - 2019)*

Diploma, *Information Technology, Rai University, 72.50%, (2013-2016)*

Diploma, *iSMAC JAVA+ Hadoop, IIHT Ltd, Grade: B, (2013-2016)*
